SKILLS

LANGUAGES

• Java 8 • Python • JavaScript 6

FRONT-END

• HTML 5 • CSS 3 • Bootstrap 4
• Ajax • jQuery • Angular 8

BACK-END

• Spring • Spring Boot • Servlets
• Spring MVC • Spring Security
• JSP • Jax-Rs • JDBC • Data JPA
• Hibernate • JWT • Jersey • JSON
• Xml • JWT • Flask • SQLAlchemy
• Restful Microservices • Node

DATABASES

• MySQL • postgres • Mongo

CLOUD

• AWS - S3, RDS (Relational datastore)
• AWS - Elastic cloud compute
• AWS - Elastic BeanStalk

DEVOPS

• Git - Version Control

FAMILIAR

• Jenkins - CI / CD
• Docker containers

HIGHLIGHTS

- 2019 December Graduate with Bachelors and Masters in Computer Science
- Received hands-on training in Java Spring MVC and Angular 8 frameworks
- Volunteering as Senior Web Developer in non-profit organization (Part-time)
- Developed a Full stack single page web Application (E-commerce Bookstore)

EXPERIENCE

WHO.WHAT.WHY SENIOR DEVELOPER | PART-TIME VOLUNTEER
April 2020 – Present | New York, NY

- Technical lead in Designing and Developing Intranet Portal for Non-profit Media Organization to collaborate and share Resources all in one place
- Collaborated with business analysts and project manager to gather and document requirements
- Integrating G-suite API to view, edit and save G-Suite Tools directly on the Web Portal.

PROJECTS

E-COMMERCE BOOK STORE

- Developed fully functional Fast and Responsive Single Page E-commerce Web Application for Books using Spring Boot and Angular 8
- Users can sign up and login to place an order for books and view their Order history.
- Functionalities: Search, Edit Cart, Sort by Price, Pagination, User Session Management
Source Code : <https://github.com/BookStore>

APPLIANCES CONTROLLER USING SMS | TEAM MODERATOR

- Collaborated with 2 electronics students and Created Home Automation System that is easy to set up and maintain using E-mail Protocols that control various Appliances
- Developed a Flask-Twilio API web server using python to send instructions to control various appliances and receive acknowledgements from Raspberry pi Server via sms and e-mails.
Source Code: <http://github.com/AppliancesController>

SOCIAL MEDIA ANALYSIS & RECOMMENDATION

- Find & categorise all individual friend circles as well as isolated persons
- Find top 100 influencers based on number of followers a Person has
- Determines the number of connecting paths / walks possible between any two given Persons
